

Pete & Brittney

Thank you for considering us to be parents to your child. We have been dreaming of becoming parents for over seven years and our pledge to you is to give your child the best life possible.

Our story -

We were married in 2008 and dreamed of having a big family, but some medical complications arose and we were not able to conceive the child that we so desperately wanted. We tried in vitro fertilization, but it failed so we began looking at other options and felt that adoption was right for us. We cant image life without children in our family.

Brittney-

Brittney loves children and family. She worked very hard and took extra time to put herself through college and get her Associates Degree in Early Childhood Education. Brittney worked in daycare for seven years after graduating, and is now starting her third year as a para-professional. She works with special needs middle school students, which she loves. Brittney is so loving, caring, and patient. She is small and soft-spoken, but the children love her, listen to her, and respect her. When we have children of our own, Brittney will become a stay at home mom.

Pete-

Pete loves children and family as well. He went to college for Information Technology so he could have a career in computers, which he loves. He has returned to school and is currently working on getting an Associates Degree in Supervisory Management. He is very successful in his job at a hospital and has recently received a promotion. Pete is a very smart, caring, sensitive, loving person and is excited and hopeful to be getting a child of our own.

Interests:

We enjoy many activities together such as going out on the river in the summer, and skiing in the winter. We also like to hang out with family, and we enjoy watching the same types of movies and T.V. shows together. During winter break we like to go on vacations to someplace warm!! We love to travel and plan on sharing our love of adventure with our children by going on family vacations often. Pete is a great outdoorsman who enjoys hunting and fishing. He also has a great green thumb and grows a giant pumpkin garden in the fall. Brittney, (who is not a great gardener) watches the growing process and sometimes helps water and harvest the crops. When the weather is nice Pete likes to play golf and Brittney is on a volleyball league. When the weather keeps us indoors, Pete likes to play video games while Brittney likes to read.

Family is very important to us. Growing up, Pete had one brother and Brittney was an only child. However, both our parents grew up with a lot of siblings, so we always had a ton of cousins to play with. Our children will have a large family with many great aunts and uncles, 3 sets of grandparents, and 3 sets of great-grand parents! We believe family is very important and family gatherings are a common occurrence on both sides. Most of our family live in the area and are here to help out and love this child.

Our newest addition to the family is a teddy bear puppy we named Isabella Louise (a.k.a. Izzy, Fluffy McFlufferton, or the Fluffinator). She is the sweetest thing who loves her belly rubbed and enjoys a good cuddle. Izzy is great with children and she can't wait to have a baby to snuggle with at home.

We recently moved to a large five bedroom home with the thought of children in mind. The backyard is large with a country setting and wildlife all around. We actually saw deer in our back yard on our first night there! The house is within walking distance to several great parks and the school. We are ready to start the next chapter of our lives with little feet, laughter, and wonderful memories.
